Summary

Throughout my years in college I've picked up a good understanding of data structure, algorithms, Object-Oriented Programming, Procedural Programming, and Database Management. I've also been fortunate enough to become a Peer Educator and a Teaching Assistant for some courses in SUNY Albany, which strengthen my understanding on Web Development and Software Engineering.

Education

University at Albany, State University of New York   Expected May 2018
B.S. Computer Science and Applied Mathematics with 3.80 Major GPA
(5) Dean's List of Distinguished Students

Experience

Undergraduate Peer Educator   August 2016 to December 2016
University at Albany, State University of New York
- Assisted students with their in-class assignments for Web Development by demonstrating writing and debugging techniques with HTML, CSS, and JavaScript.
- Mentored student outside of class to better manage their time to get assignments done on time.

Undergraduate Teacher Assistant   January 2016 to May 2016
University at Albany, State University of New York
- Coordinated lab sections where students learned about class material through hands-on assignments.
- Hosted office hours, where I aided students understand concepts and writing techniques on the Java programming language.

Skills

- Web Development and Frameworks
- Object Oriented Programming
- Procedural Programming
- Relational Database
- Problem Solving
- Algorithms and Data Structures
- Command Lines
